

“What [design workbooks] share, I will suggest, is not just the description of a design space but its creation.”

Gaver, “Making Spaces,” p. 1551

Gaver argues that workbooks are used not merely to document a set of requirements and constraints for a design, but rather to enlarge the space of possibilities for what a design could be.

They are a generative tool, often best used early in the design process before a single design approach gets “locked in.”

This line demonstrates that I know one or two of the **most important parts of the reading**.

This is a direct quote from the reading. It may be a large or small idea. Note that I changed the words a bit but **used brackets to indicate this**. Only change a quote to make it more excerptable, but don't change the meaning!

This line summarizes the idea **in my own words**, demonstrating that I understand what **the author meant by the quote**.

This citation includes the **author name**, the **name of the article**, and the **page number**.
